HYDRAULIC AND TIDE TABLES,

TO AID THE CALCULATION OF WATER AND MILL POWER, WATER SUPPLY, DRAINAGE AND NAVIGABLE RIVERS. WITH SYNOPSIS OF RAIN-FALL IN GREAT BRITAIN; TOGETHER WITH THE PROPERTIES AND STRENGTH OF MATERIALS USEFUL NUMBERS; POWERS, ROOTS; AND LOGARITHMS.

By NATHANIEL BEARDMORE, Member of the Institution of Civil Engineers.

The First Edition of this Work was received with much greater favour than the author had at all expected; and the sale was large, for so technical a work. To extend the use of this edition as a hand-book for the Engineer, in matters relating to Hydraulics and Hydrodynamics, many new Tables have been constructed, and Tide Tables are inserted at the close of the book, chiefly compiled from the data altered in the Admiralty Tide Tables and from the Nautical Almanac.

The introductory remarks on the use of the Tables, have been amended, and more information is interwoven, chiefly on our English rivers—the drainage areas of the more important of which have been especially computed from the Ordnance Map. In the original remarks on tides and rivers, experience and practice are the great guide; and therefore, to obtain the best data for practical results we have carefully collated all the well-authenticated data within our reach or personal experience, as I had them condensed into tabular forms.—*Preface to Second Edition.*

AN ENCYCLOPÆDIA of CIVIL ENGINEERING, Historical, Theoretical, and Practical.
By EDWARD CREST, F.R.A. C.E.

"The object of this work is to embody in a single volume all the information involved in the theory and practice of Civil Engineering. It is intended to form at once a complete Manual for the Student, and a Guide to him in his professional avocations. The First Part contains an Historical Account of the most celebrated Engineering Works executed by the Ancients, followed by ample descriptions of the improvements in engineering science introduced in America and Europe. The Second Part is entirely devoted to the Theory and Practice of the Science, including Canals, Draining and Embanking, the Formation of Railways, Gradients, Rails, Plants, and all the subjects falling under the head of Railway Engineering.

"A desideratum in the history of engineering science is supplied by the publication of this remarkable volume. There is not a member of the community, from the highest engineer to the humblest surveyor, who will not find here materials to enrich his mind and extend his knowledge."—*Irish Railway Gazette.*

TO MANUFACTURERS AND CAPITALISTS.
TO BE SOLD, the FREEHOLD of an extensive WAREHOUSE, situate in Bell lane, Spitalfields, of 80 feet frontage, 80 feet deep. The building is in good substantial repair. A portion of it has been used for a granary, and is provided with hoisting-tackle, to raise to the top floor of the building. Any person requiring extensive warehouse-room, or premises for carrying on manufacture or patent on a large scale, will find the above deserving their immediate attention.—Apply to Mr. KING, 8, John-street, Spitalfields.

TO IRONMONGERS, STOVE GRATE MANUFACTURERS, AND OTHERS.
TO BE SOLD, by PRIVATE CONTRACT, LICENSES for the SALE of a VALUABLE PATENT IMPROVEMENT in one of the leading articles of the trade. The principles of the patent have been highly approved by first-rate and scientific men, its application is inexpensive, and simple in detail, most valuable in its results, and thoroughly effectual in its operation. It has been applied to several public buildings and private mansions with great success, and when fully brought under the notice of the public, the advantages it presents will cause extended sale. Arrangements have been made with one of the principal firms in Sheffield, who at present are the only firm licensed for the manufacture, and to a stove grate maker or ironmonger in London would form a most valuable adjunct. It is now proposed to dispose of Licenses for the sale of the patent articles, already manufactured and stock in trade in London, and if desired, the lease of the premises. The patent right for a term of fourteen years may also be purchased.—For further particulars apply to Messrs. FULLER and DORSEY, Billiter-street.

TO IRONFOUNDERS.
TO BE DISPOSED OF, by Private Contract, the BUSINESS of an IRONFOUNDER, in London, with the Plant, Implements, and Stock in Trade. The business has been established nearly twenty years, and is now in full operation, employing between thirty and forty hands. The returns for the last three years averaged about £4,000 per annum; the connexion is highly respectable, and the situation central. The premises are spacious, and comprise a light and lofty foundry, with requisites, a small to cover same, powerful crane, stove and the appurtenances; smith's shop, with two fires; turnings and pattern shop, two-stall stable, paved yard, with galvanized roof; two counting-houses, a large plot of ground in the rear of the premises; also, two Dwelling Houses, with shops in front, which are let off, at rents equal to the ground-rent, leaving the remainder of the premises free from rent. The principal buildings have been erected but a few years, in a most substantial manner, and the whole of the premises are well arranged for the business. Capital will be required. For further particulars apply to Messrs. FULLER and DORSEY, 13, Billiter-street, City.

TO IRONMONGERS.
TO BE DISPOSED OF, in the Midland Counties, a FURNISHING and GENERAL IRONMONGERY BUSINESS.—Particulars to be obtained of Messrs. HAWKES and GROOMS, Union-court, Holborn-hill, London.

TO BUILDERS.
TO BE DISPOSED OF, in consequence of the sudden and recent death of the late proprietor, a FIRST-RATE BUILDER'S BUSINESS, which has been profitably and successfully carried on at St. Neot's, Huntingdonshire, for upwards of ten years.—Application to be made to Mr. WM. PAINE, Solicitor, St. Neot's, who will furnish the particulars.

TO BE DISPOSED OF, the GOODWILL of a TIMBER-YARD, &c. at a premium, situate in a good leading thoroughfare; consisting of a large yard, double entrance, counting-house and stabling, large carpenters workshop, and cabinet-maker's front shop, and with excellent dwelling-house. The premises are particularly well adapted for the timber trade. Address, A. F. at Mr. Bowles', Wheelwright, Tyers-street, Lambeth, where satisfactory information will be given.

PAPER-HANGINGS.—By recent improvements in block and cylinder printing, good satin and other room papers are offered to the trade, at very reduced prices by JEFFREY, ALLEN, and CO., Kent and Emery-yard, 113, Whitechapel.
